

What is it about?

EDVESTM COVID-19 Response for Schools in Africa

We are currently living through an unprecedented global crisis resulting from the pandemic caused by the novel Coronavirus. Due to the spread of the pandemic, schools have been forced to suddenly shut down causing students and educators to find alternative means to learn and to engage students during this period. Inevitably, remote learning engagement is the best medium for such engagement.

Edves is opening up its platform to Primary and Secondary (K-12) schools across Africa by coming up with a special "COVID-19 Beyond the Classroom" bundle to avail benefiting schools the opportunity to engage, test and track learning outcomes of students during the shutdown period.

We have grouped together features that will help every school continue student and parent engagement online without changing the curriculum and pedagogy adopted by the school. This will ensure delivery of the same quality of education remotely.

COVID -19 BClass bundle features
